A combination of elegance, vibe and mood makes a perfect recipe for an alluring restaurant experience. With tropical style cabana, quirky bar and the use of bold colours and graphics, this terrace lounge restaurant in the heart of Panipat is just that. An exuberant party place designed by Puneet Narang, Architect and Design Head of Puneet Narang Concepts, Circle Lounge is a melody of taste and owner's brief. With the notion to craft a space to gather and spend time with family and friends and also keep sustainability in mind, wood became the focus material in the space. Outdoors with high pressure laminate sheets lay a subtle background for the rooftop terrace. Red plants and hand painted art infuses the perfect flavour of modernity and feels like poetry flowing through the space. Furniture finished with various textures and sheens of Italian wood finishes by ICA and tables with terrazzo marble table tops sets the mood right.

The designer's inclination towards art can be picked up everywhere in this project. From the use of hand paintings to catchy art prints, the space is eclectic and offbeat. The moment you enter this lounge, the play of colours takes one to another high. The fierce tiger at the entrance draws command and gives a gist of what's ahead. Use of black and white flooring in the restrooms and cabana lays a neutral base for the rest of the design elements to perfectly pop with their shapes and colour. With a character of its own, Puneet's vision flows throughout the lounge with his creativity soaring in the sky. The wide range of Italian wood finishes from ICA render a state of art and luxury. Owned by a group of young aesthetes with great taste in design, Circle Lounge is a perfect hangout space in a small town like Panipat—all parts exquisite, charming and suave.
